

# HYGENIC STAINLESS STEEL TOOL CABINET

Keep all your maintenance tools within the food production area and improve breakdown response times.

No more dirty rusty tool boxes.

Clean Tools can be safely locked into the trolley within the food production area without the engineers continually having to go back to the workshop.

Each personal tool box can be pad-locked into position and the tools will be safe.

## FEATURES:

- 3 large pull out drawers on runners.
- Side shelves for larger items.
- Heavy duty worktop.
- Swivel & brake castors.
- Fully panelled and splash proof.
- 6 off tool boxes supplied as standard.

Particularly useful in 'high risk' areas to prevent unwanted contaminants from being brought in from outside with the engineers.

Available in grade 304 stainless steel  
(AS SHOWN)

and grade 316 stainless steel

Other sizes also available upon on request.
